

### REACH COMPLIANCE STATEMENT

Dear Valued Customer,

Cirebelle (Pty) Ltd is pleased to announce our progress in becoming REACH Compliant. REACH is a regulation that comprehensively governs the Registration, Evaluation, Authorisation and Restriction of Chemical substances in the European Union.

Under the definition of the REACH regulations EC1907/2006, Cirebelle is classified as a producer of "articles" as per REACH Article 3(3).

We confirm that Cirebelle products are in compliance with the REACH Regulation (EC) No. 1907/2006, meaning that all the chemical substances contained in our products

- Have been pre-registered and/or have been registered by our company by our company or our suppliers and/or
- Are not within the scope of the REACH Regulation and/or
- Are exempted from registration (e.g. according to Art. 2, Annex IV or V of REACH)

The REACH code of practice calls for all article suppliers to inform their stakeholders if an article contains a Substance of Very High Concern (SVHC) in excess of 0.1% by weight.

Based on the material content certification's provided by Cirebelle's distributors, no harmful substances exist in the materials that we use in our products, including packaging and shipping materials. In view of that, Cirebelle products do not contain any of the currently listed SVHC.

Cirebelle fully supports the aim of REACH in improving the protection of human health and the environment through better and earlier identification of the intrinsic properties of chemical substances. Thus, we will continue to comply with REACH requirements and notify our stakeholders of any change in article content.

In addition, Cirebelle will continue to work closely with suppliers, distributors and regulations to ensure that our customers have access to the highest quality raw materials.

Kind regards,

Liesl Keulder
